

Cable trays on the fiber optic cabinet

Overview

Fiber cable trays isolate jumpers from other cables, support multi-directional routing of jumpers, protect jumpers from physical damage while ensuring their bending radius, and provide storage for redundant jumpers. The purpose of this AE Note is to outline the use of fiber optic cables in “tray rated” environments. While there are several specific types of listings for power cables, specifically for tray. Optical cable tray is a system designed to protect and route fiber optic patch cords, cable assemblies to and from network cabinets, ODF and other terminal devices. Our Fiber Cable Tray System is a comprehensive raceway solution for data center, enterprise, central office, and mobile switching center applications. Fiber optic adapters, fiber optic pigtails, patch cables, attenuators, PLC splitters, fused fiber optic splitters, SC, FC, ST, LC, E2000.
