

Climbing Communication Towers

Overview

Employees climb communication towers to perform construction and maintenance activities and face numerous hazards, including fall hazards, hazards associated with structural collapses and improper rigging and hoisting practices, and “struck-by” hazards. Over the past 30 years, the growing demand for wireless and broadcast communications has spurred a dramatic increase in communication tower construction and. A tower climber is a professional who can inspect, maintain, and repair work on cell towers. These include guyed, self-supporting towers, monopoles, and other tower systems that require regular inspection and maintenance. Cell tower climbers work a hazardous role, but this is a profession in demand. Specialized training programs teach climbers the necessary skills, knowledge, and techniques required to safely ascend, descend, and maneuver at heights. These courses cover topics such as the proper use of safety equipment, emergency procedures, first aid, and communication protocols. Tower climber vacancies can come under the following names: These positions typically require knowledge of the following: A valid UK / EU driving license (Category B) is usually required for these positions, as technicians work remotely and require access to areas without public transportation. Our training emphasizes the fundamentals of safe.
