

Customized High and Low Voltage Complete Sets of Equipment for Northern Europe

Overview

This solution covers a complete set of power equipment from low-voltage distribution cabinets, high-voltage switchgear to transformers, automation control systems, etc., aiming to provide comprehensive and customized power solutions for various users. The FYRMB energy meter box mainly consists of a box body, circuit breaker, miniature circuit breaker, electricity meter, and concentrator, etc. It is widely used in commercial outlets, villas, residential areas, and civil places with high power consumption and multiple power usage that require. We have been serving the needs of Municipal, REA and Commercial customers since 1991. We are overhead and underground high voltage specialists in transmission, distribution, substation, industrial and switchgear, and offer power equipment and products from Burndy, Elastimold, Preformed Line. Our high and low voltage complete electrical equipment solutions are designed based on a deep understanding of the current development trends in the power industry and accurate predictions of future power demand. We're committed to developing positive relationships with our. These products are highly integrated, compact in size, structurally compact, safe and reliable in operation, easy to maintain, and portable. In distribution systems, they can be used in ring network distribution systems as well as in dual power supply or radial terminal distribution systems.
