

Fiber optic patch cord SC integrated component

Overview

SC/UPC fiber optic patch cords, also known as jumper cables or patch cables, are essential components for connecting network devices within data centers, enterprise networks, and high-performance computing environments. Single mode fiber optic duplex patch cord with integrated rip-cord in outer coating and SC-SC connectors. These cables transmit data pulses as light signals through optical fibers. At ZION Communication, we design and manufacture a full range of fiber patch cords for: This guide will help you quickly understand the main types of fiber patch cords and how to choose the right solution for your project – and how ZION can support you with stable quality, flexible customization. Fiber optic patch cords refer to fiber optic cables with connectors at both ends and a thick protective layer. It is mainly used in applications such as optical fiber communication systems, optical fiber access networks, optical fiber data transmission networks, and local area networks.
