

Fire distribution box placement location

Overview

"FDC placement must be on the street-facing side of the building. "Provide 3-foot clearance around the FDC. " — Remove any landscaping, signs, or bollards that encroach. "Where you position your fire extinguishers can make a difference, and several important factors can help you with this. Next, match extinguisher type to likely hazards, then plan spacing so people can grab the right unit fast, even in smoke and. Knox boxes (key lockboxes) and fire department connections (FDCs) are among the most detail-sensitive items on a site plan. Extinguishers should be placed where they are readily accessible in the event of a fire, which typically includes normal paths of travel. If visual obstructions cannot be avoided, then arrows, lights, or. Fire extinguisher placement in the UK is guided by standards set in BS 5306-8:2012, which covers the selection and positioning of portable fire extinguishers. Potential fire hazards present in specific.
