

How to install the fiber optic secondary terminal box

Overview

Learn how to install a fiber optic termination box step-by-step for FTTH projects. Covers mounting, splicing, routing, labeling, and testing for indoor/outdoor use. A. The following steps provide a detailed installation guide for fiber termination boxes: Before starting the installation, you will need the following tools and materials: Fiber termination box: Select a fiber termination box that meets your requirements and specifications. Ensure that it complies. These are the Fiber Access Terminals, a point to complete the termination of fiber drop cables in FTTx networks. With various sizes and high resistance it allows for flexibility in operation and installation. It functions as a junction between the incoming fiber cable and the outgoing customer-side fiber cable, where one fiber can be spliced, patched. The indoor fiber distribution terminal is a compact fiber box solution for installation requirements in small to mid-sized MDUs, multiple dwelling units, or multiple tenant units (MTU).
