

# How to plug the round connector of a fiber optic cable into a router

## Overview

**Fiber Connection:** Locate the optical port on your router and carefully insert the fiber cable's connector, ensuring a snug fit. Click it into place if it has a locking mechanism. **Compatible router:** Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). Are you interested in seeing how fiber optic connectors get mechanically plugged into an adapter?

This video goes over common types of connectors, their respective adapters, and how to properly connect and disconnect them. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid. Remove the connector boot and riveting ring and insert it into the fiber. Inject glue Use special glue, insert the glue bottle from the tail handle, squeeze the glue bottle until glue overflows from the end of the ceramic ferrule. The process of connecting a fiber optic cable to a connector involves several meticulous steps: Ensure a clean environment and use ESD gloves to safeguard the optical fibers from static damage. Here's a simple guide to help you through the process: 1. Check Your Fiber Optic Equipment Before you start, make sure you have the necessary equipment: Fiber Optic Modem (ONT - Optical Network Terminal):.
