

How to process the inner bend of a cable tray

Overview

This is a step by set guide on how to make (fabricate) a 90 degree bend in metal cable tray and use a cable tray bending machine to make the same bend. Videos are training aids for City and Guilds (C and G) and EAL courses Level 1, 2, 3 plus AM2, AM2S and AM2E. The first step in preparing the. The first step is to mark out the tray (A). Construction of a flat 90° bend (A) The amount of tray lip to be removed is equal to 2, 3/4 the width of the tray, half of this measurement will be removed on either side of the centre line. To remove the lip we can use a small hand grinder (B) or a file. The bends, tees, crosses, risers and reducers of wire mesh cable tray can be easily and quickly made live at the project by using a bolt cutter. Only two splices are required to securely connect tray widths of wire basket tray. You can follow me day by day on.
