

How to use a fiber optic cable cutter

Overview

In this video, you will learn how to cut optical fiber cable step by step. We demonstrate the proper method for 4 core fiber cutting using the right tools. Also known as optical fiber cable strippers, they hold cable within a slot, squeeze their jaws to press through the coating, and slide the coating off the end of the cable. Sharp-edged slots in the jaws. Fiber optic cables are essential components in today's communication infrastructure. They transmit data as pulses of light through strands of glass or plastic, providing high-speed internet, seamless data exchange, and efficient signal distribution. However, due to their fragile nature, cutting. trueCABLE has introduced extremely high quality fiber optic kevlar cutters (trueKEVCUT) furthering the “one stop shop” nature of our line of products and tools for installation and termination of bulk fiber optical distribution cable. 00 mm) and cable with a sharp scissors. The medium diameter filaments (1.
