

I've switched to a fiber optic router and the internet keeps going offline

Overview

A router glitch, faulty cabling, or congestion on your home network can bring your speeds to a standstill. Luckily, these issues are often easily solved with a few simple troubleshooting steps. The gateway to fast streaming in 4K, gaming, and whatever else you could come up with. Well, that wasn't my experience. In this guide, we'll walk you through the top five most common connection problems and how to fix them. My internet (fiber to the curb) has been dropping out intermittently, from once to multiple times a day. I'd run some continuous ping tests to start narrowing things down: Your Router ISP Gateway/Router Major website or DNS (anything that will leave the ISP network.) Then next time the lag spike happens see which pings spiked. That will help narrow down if. From random disconnections on Windows 10 to more persistent problems like new SSD constant internet disconnection, there are a wide range of factors that could be causing the problem.
