

IoT-grade 1.6T optical module PAM4 selection guide

Overview

Broadcom's Optical Module PHY portfolio spans multiple technology nodes — 16nm, 7nm and now 5nm, with data rates from 100 Gbs to 1.6T. Comprising five flagship platforms, Centenario, Jesko, Portofino, Gemera, and Cygnus, Broadcom's DSP PAM-4 portfolio covers 100G to 1.6T. This article provides a guide to selecting 1.6T optical modules and highlights their key application scenarios. 1.6T Ethernet or InfiniBand connection may cause permanent damage to the device. It is the direct evolution of 800G optics and is designed to meet the rapidly increasing demands of AI training clusters, high-performance computing (HPC), and data centers. This article examines the key differences among six NADDOD 1.6T. • Fiber characterization data (42K samples from single large vendor). 38 nm, estimated by maximum likelihood. 5 Gbps PAM4 per lane for an aggregate data.
