

Is the router that comes with the fiber optic cable slow

Overview

Fiber routers are known for their reliability, as fiber optic cables are less prone to interference and signal degradation compared to traditional copper cables used in normal routers. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. Is your router plugged directly into the ONT?

Or is there a ISP provided “modem”/router in between your router and the ONT?

Are you DHCP, Static IP, PPPoE?

Can you direct connect 1 computer to the ONT for a while and see if it continues?

Or use the ISP supplied router for a bit?

Ether can eliminate. A fiber router is designed to work specifically with fiber optic internet connections, providing faster and more reliable speeds compared to a normal router that typically works with traditional broadband connections. Fiber routers are able to handle higher bandwidth demands and offer lower. The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection. Many people experience slow speeds and buffering videos because their router can't handle the fiber's power.
