

OPGW optical cable 72 cores

Overview

AFL CentraCore OPGW (Optical Ground Wire) is preferred for its compact size and ability to house up to 72 fibers in a diameter starting at only 12mm. Aluminum-clad steel and aluminum alloy wires are stranded around the central element in single or multiple layers. FIBER OPTIC CABLE Fiber Optic Cable © 2002. facing corrosion resistance. The multiple loose tube type is designed mostly for large fiber counts requirement over 48 cores with the maximum fiber counts reaching 96 cores. 40 mm) +1th Layer: (20%AS. OPGW is a type of cable structure with composite of optical transmission and overhead ground wire for power transmission. Its working in power transmission line both as optical fiber cable and overhead ground wire which can provide protection of lightning strike and conducting short circuit. Optical Ground Wire (OPGW) cables are advanced composite overhead conductors that combine the functions of a ground wire and optical fiber communication within a single integrated solution. Installed at the top of high-voltage and extra-high-voltage transmission lines, OPGW cables provide lightning.
