

One-fiber-eight-electric PoE power supply switch

Overview

The energy-efficient NG8POE-1 network switch connects up to eight devices to a Gigabit Ethernet network and allows them to communicate with each other. It's recommended for your home network, small office, workgroup or creative production environment. PoE+ Ethernet switch conforms to IEEE 802.3af/at, includes eight PoE RJ45 ports with 10/100/1000 Mbps on all ports, 2 SFP ports, automatic data transmission speed detection, autocrossing function, and QoS with a 120 W power budget. Download additional CAD file types. An article-related China RoHS. OmniConverter 10/100/1000 and Multigigabit PoE Switches and PoE Media Converters enable distance extension over fiber optic cabling to network edge devices such as workstations, IP cameras and Wi-Fi access points. It helps you share large bandwidth-intensive. An 8-port, Layer 2 PoE switch with a fanless cooling system. Altronix NetWaySP8X PoE+ Indoor Hardened Switch provides two (2) 1Gb SFP (Fiber) ports and eight (8) PoE+ (30W) or two (2) 60W ports, passing data for PoE/PoE+ compliant devices. Cameras/edge devices may be located up to 100m from the unit. Embedded LINQ Technology allows you to monitor, control. The EX-62035MPoE-SFP is probably the smallest industrial-grade 10-port Gigabit web-managed PoE switch and offers full Gigabit performance on all ports despite its small external dimensions.
