

# Papua New Guinea SFP Optical Module 100G

## Overview

LQD-CW400-LR4C is a transceiver module designed for 10km optical communication applications, and it is compliant with 100G Lambda MSA standard. The advent of the 100G SFP112 optical module with its innovative design fulfills the growing demands for both current and next-generation high-speed network transmission. This single-channel transmission solution leverages PAM4 modulation technology, converting one electrical signal into one. The LINK-PP LS-DW2110-40I SFP+ transceiver supports up to 40km link lengths over single-mode fiber (SMF) via an LC duplex connector. Digital diagnostics functions are available via a 2-wire serial interface, as specified in. The NEC's 100G SFP112 achieves 100Gbps transmission with a size equivalent to existing SFP modules. These compact, hot-swappable devices are essential for modern high-bandwidth applications. Product Specifications/Features SFP Optical Transceivers are hot-swappable, compact media connectors that provide instant fiber connectivity for your networking gear. It provides the SC. Through silicon photonics and signal processing technology, Cisco has taken the first step toward that vision: single-lambda 100G optics. It will also allow you to upgrade to 400G.
