

PoE switch is showing a red light

Overview

If possible, check if the PD can turn on with another PoE switch or with an external power supply. Check that the Ethernet cable that you are using is of good quality. In a basic PoE power supply system, the major components are the power sourcing equipment (PSE), the powered device (PD), and the PoE cables. This guide explains what each light means, how to. I can't even get an IP address from it. When I reset it it just stuck on a boot loop. looks like it's trying to tell you that it has no cpu, but then realizes it has no cpu Thanks for your patience. If still under warranty, please submit a RMA at rma.com and share your RMA # here. The lights on POE switches mainly include power indicator lights, system operation status lights, POE mode status lights, and business interface indicator lights. This guide provides a step-by-step troubleshooting. Does anybody know what the red LED on the PoE+ hat is for?

If it is like the main Pi red LED where always on is "good", is there a dtparam to disable the hat LED?

Thanks! Re: PoE+ Hat Red LED - What does it mean?

The LED lights if it detect an upstream Type 2 power source ie one that can supply.
