

Qatar Customs Broker High-Speed Optical Connection 200G

Overview

The QSFP56 module has four transmit and receive channels, each capable of 53.125 Gb/s operation which together yield an aggregate data rate of 200Gb/s. The 200G transceiver represents a critical advancement in high-speed optical connectivity, delivering the performance and efficiency needed for modern data centers, cloud networks, and 5G infrastructure. Designed in compact form factors such as QSFP56 and QSFP-DD, these transceivers support 200G. Keywords: 200G optical module, QSFP56, QSFP-DD, AOC, DAC There are two mainstream technical directions for 200G optical modules, one is the QSFP-DD package, and the other is the QSFP56 package QSFP56 package, is the extension of QSFP system package, is a 4-channel structure; QSFP56 200G optical. variety of high-density and low-power 200 Gigabit Ethernet connectivity options for data center, high-performance computing networks, enterprise core and distribution layers, and service provider applications. The QSFP56/QSFP-DD-200G modules are our latest generation of 200G transceiver modules. QSFP-DD 200G family are new generation of 200G transceiver modules solution based on QSFP form factor.
