

Taiwan AI Server Platform

Overview

Taiwan AI Cloud (previously TWSC), an Affiliate of ASUS Group and a public-private partnership (PPP) with the Taiwan government, has built several TOP500 supercomputers and has become a key leader in advancing Sovereign AI. Taiwan's AI server makers just delivered a first quarter that would have seemed impossible two years ago. The five leading ODMs generated more than NT\$2 trillion (roughly US\$63 billion) in revenue, driven by Nvidia's GB300 rack platform and a surging wave of custom ASIC servers from the major US. Hon Hai Precision (Foxconn) is tripling AI server output as Nvidia demand peaks, anchoring Taiwan's role in the AI hardware chain. Demand is starting to extend to much less visible parts but essential for a high-performance rack to operate and be maintained: connectors, chassis, cable management arms, and. Today, Taiwan's manufacturing giants—once defined by their prowess in consumer electronics—are generating more revenue from AI server production than from iconic products like the iPhone. This tectonic shift reflects a new industrial playbook: one powered by artificial intelligence and driven by. TAIPEI (Taiwan News) — Taiwanese AI server makers are ramping up production to meet surging demand from the US, the country's largest market for generative AI hardware, Nikkei Asia reported Thursday. Top electronics manufacturers Foxconn, Quanta Computer, and Wistron are expanding output in Taiwan. Taiwan AI Cloud and Tainan City Government Collaborate to Create a New Model for Smart Cities The 2025 AIHPCcon will be held on December 2nd. Register now! Taiwan AI Cloud officially launches its new brand identity.
