

The cost of successfully building an IDC Internet Data Center

Overview

Data centers require reinforced buildings, raised flooring for cable management, and specialized layouts for airflow. Costs typically range from \$600 to \$1,200 per square foot, depending on design complexity and tier level. High-tier facilities demand redundancy and durability. Land costs vary widely depending on geography, infrastructure access, and regional policies. Urban areas offer proximity to networks and talent but come with higher land prices and stricter regulations. Building a data center requires a hefty upfront investment, often exceeding initial estimates. Percentage change in data centre construction tender/bid prices in your region over the past 12 months?

The most expensive markets in our data centre construction cost index remain the same as our 2024 report. What is Data. Here's how costs typically come together: Microsoft's recent projects in Castroville, Texas — each ~250,000 sq ft — cost \$350 million. Architect Tip: Begin with a 1,000 sq ft prototype (~\$1M build) to test systems before.
