

The distribution box is making a hissing sound and has tripped

Overview

Check the fuse or circuit breaker: Check for a blown or tripped fuse or circuit breaker. If you hear a chirping sound from your fuse box, it isn't going to be one of our feathered friends trapped in there, and it's unlikely to be an insect either. If you ignore it. Distribution boxes are the unsung heroes of our electrical systems, quietly managing power until something goes wrong. When they start tripping, overheating, or making strange noises, it's more than just an inconvenience - it's your home's cry for help. Resolution: Operational noise has been a question for a long time and it is generally a stacking up of factors which by themselves go unnoticed, but which together are noticed. • Loose bolts, current. Today I heard a moderately loud "bang" sound whilst in the house, similar to someone dropping a heavy book, and the upstairs sockets all lost power (sockets has its own breaker). Make sure the power supply is.
