

West Africa Plastic Fiber Optic Channel Factory

Overview

Coleman Wires and Cables has commissioned the Africa's largest fibre optic cable factory and the continent's first reinforced plastic production line at Coleman Technical Industries Limited in Sagamu, Ogun State. While submarine communications cables are used to connect countries and continents to the Internet, terrestrial fibre optic cables are used to extend this connectivity to landlocked countries or to urban centers within a country. The Federal Government has inaugurated Coleman Industries Ltd's new fibre optic cable manufacturing factory in Sagamu, Ogun State, with an annual production capacity of over nine million kilometres of fibre and a reinforced plastic production line. Proudly Nigerian-owned, driving local innovation and industrial growth. The factory, built by Coleman Technical Industries Limited in collaboration with an American firm, Fibre Business, EMEA, is expected to boost innovation. Dapo Abiodun, Governor of Ogun State in Nigeria, inaugurated the first fiber optic cable manufacturing plant in West Africa on Thursday, July 14.

Article Content

1st Fibre-optic Cable Factory In West Africa

The plant was built by Coleman Wires and Cables and Corning Inc., and it is the first fibre-optic factory in West / Central Africa and the 5th in Africa as

Liquid Telecom completes East/West pan-African fiber
