

What are some waterproof materials for outdoor server racks

Overview

These are manufactured from galvanized steel, aluminum or stainless steel material, making them the perfect layer of security against outdoor bad weather conditions. AZE's 19" outdoor server racks and outdoor network cabinets are ideal for protecting sensitive network systems from any damage due to impacts and harsh climatic conditions. Unlike indoor data cabinets, these units carry formal Ingress Protection (IP) ratings. Understanding IP and NEMA Ratings for Waterproof Protection First and foremost, understanding protection ratings is crucial for selecting the right waterproof server cabinet. These ratings determine how well your equipment survives in challenging environments. Additionally, choosing the wrong. NEMA 12 enclosures are constructed for indoor use and provide a degree of protection to internal equipment against circulating dust, falling dirt, lint, and fibers.
